

BLU+HELDEN

OVERVIEW OF ORGANIZED PLAY FORMATS

Limited-Format

Starter-Deck Limited

Official Starter Decks + 1 Booster will be provided to help you choose your Starter Deck. You will play exclusively with the selected Starter Deck and the cards from the Booster. The choice of Starter Deck is made after the Booster has been opened.

Draft

How does a Draft work?

Each player receives their Equilibra cards. These **9 cards** form the foundation of your Draft Deck. Each Booster Display contains 3 Draft Boosters, each with 1 card set for 2 players. This means with a single Display, you can start a Draft round with **6 players**.

Additionally, each player receives 3 Booster Packs.

Draft Procedure:

Each player opens one Booster, picks one card from it, and passes the remaining cards to their left. You receive a new pack from your right, pick one card, and pass the rest again. This continues until all cards are distributed. The second Booster is passed to the right, and the third Booster is passed to the left again.

In the Draft Booster, you can choose any of the 4 Sovereigns, depending on the cards you've drafted. Additional play costs from the Sovereign do not apply in the Draft – you may play all colors without paying extra ASP!

This ensures the focus is on fun and lets you build amazing combos.

Important:

You may not play enemy colors with your Sovereign.

In the Pool Slot, only cards matching your Sovereign's color and Equilibra cards (e.g., *the grey cards from the Draft Boosters*) are allowed.

Deck Building:

From your drafted cards and the 9 provided Equilibra cards, you build a deck of at least **40 cards**, including your Sovereign and Rune. The pool must contain all available Equilibra cards.

The remaining cards are available as a sideboard or for deck changes. You may swap cards into your deck between games.

Why play Draft?

Everyone starts on equal footing – it's all about your decisions, not your collection. You'll discover new combinations and strategies. Draft is full of surprises, excitement, and tactical gameplay!

Even better: our Boosters are specially designed for Draft formats – with balanced distributions and fair chances for powerful cards.

Have fun playing!
